

Stain-Out

Stain remover

Area of application: For the effective releasing and removing of oily and greasy stains, grass stains, stains from felt-tip pens, ballpoint-pens and many other types of stain on carpets, carpet floorings, fabrics of upholsteries and textiles.

Properties:

- Free from phosphate

Technical data:

Nature of the product	Liquid
Colour	Slightly yellowish
pH-value (concentrate)	approx. 9.5
pH-value (1 %)	approx. 8

Application:

Test the fabric for colour-fastness in a hidden position: for this purpose, wet a clean, white cloth with **Stain-Out** and rub the fabric off. If colours bled into the cloth, the use of **Stain-Out** is inadvisable.

Stain removing: Spray it on the stains, allow it to act for 30 s, rub it off using an absorbent cloth (e. g. terrycloth towel).

If the stains are intensive, replace the cloth for several times.

If the stains are large, it is definitely necessary to work from the outside towards the centre.

Stain-Out is also outstanding as pre-spray agent in the laundry process: Spray on stains on colour-proof clothes, such e. g. dirty rings around white shirt collars, directly before washing in a washing machine and wash as usual.

If natural fibres are very absorbent, its effect is limited.

It is not suitable for stains caused by rust, ink or fruit.

Storage:

Always keep containers well closed, out of sunlight and out of reach of children. Do not expose to high temperatures.

In closed original trading units at room temperature it is stable for at least 24 months.

Packaging unit:

250 ml bottle, 12 pieces in cardboard box Art.No.: 0405 - 00025

Other trading units on request.

Special information:

For commercial use only.
